

## Rebate Diversity With Pacific Food Distributors!

Pacific Food Distributors has been your Northwest choice for quality food distribution, and now we are your choice for earning buying group rebates and incentives!

We have developed a plan to work with Unipro and Golbon to ensure that if you buy cases of an approved supplier's product through us. You can now earn the same rebate or incentive through PacFoods as you would have had you bought directly from the supplier!

With the use of EDI and computer tracking, Pacific Food Distributors will now report all of your approved purchases directly to your buying group! We are passing on our rebates straight to you, so you get the benefit of belonging to a buying group paired with the convenience of smaller minimums, frequent delivery, and the customer service you have come to rely on from Pacific Food Distributors!

## Here is how it works:

- Pacific Food Distributors will electronically send Unipro or Golbon a file every month telling them what you purchased from us for approved buying group suppliers.
- The only exclusions will be vendors we receive net pricing on; meaning to take part in the program we would have to significantly raise prices to you.
- This report will be item and UPC specific, so if one supplier provides different rebates on different products, you will receive the correct rebates for that item.
- The buying group you belong to will distribute your earned rebates on your normal rebate check. Look for Pacific Food Distributors on your statement!

We hope our new program will help make your purchasing choices easier, and help you reach your buying group's goals even faster!
